

ARABESCATO VAGLI

Category: arabescato

Colour: white

Petrographic name (according EN 12407): Marble

Macroscopic description: A monogenic marble breccia with clasts varying from centimetric to decimetric and up to metric in size that are close to one another and immersed in a dark grey and ivory brown or greenish-coloured groundmass. the clasts are white in colour and have slender ivory or grey veins in places as well as light grey patches up to centimetric in size due to the variation in grain size of the elements. inside these patches surface pores can sometimes be observed. the edges of the clasts are irregular and indistinct in places.
