

IRIS ONYX

COLOUR

Beige

MACROSCOPIC DESCRIPTION

Iris Onyx is a natural stone characterized by a honey-colored background, elegantly crossed by veining and shadings that may sometimes be lighter in cream, white and ivory and sometimes may be darker, almost brown. Iris Onyx is extracted from Turkish quarries and is, as many other onyxes, ideal for projects that demand backlit applications, creating original effects of light and shades that can transform interiors and give exclusiveness and originality.

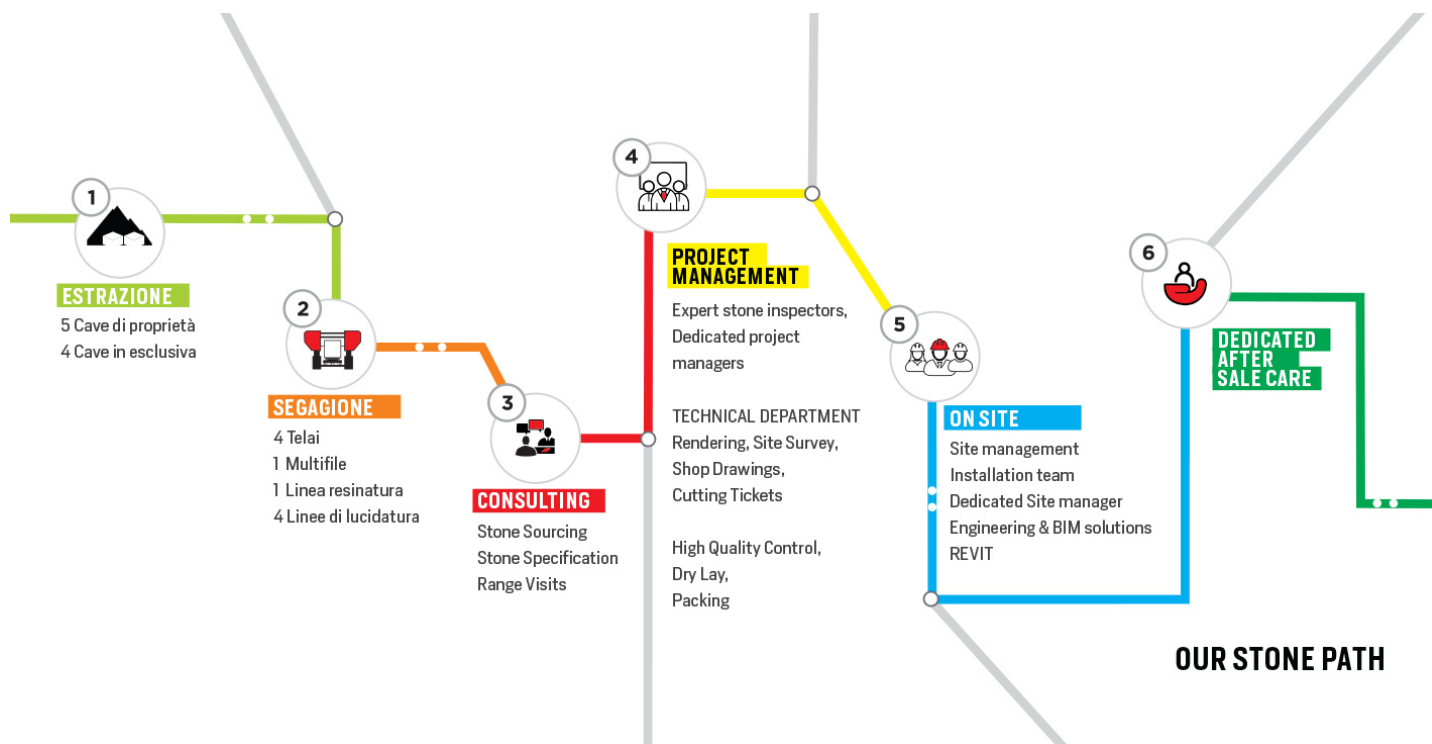

Iris Onyx is a material perfect for staircases, facings, tops for kitchens and bathrooms, sinks, decorative objects as vases and trays, and even jewelry. The best finishings for materials as onyx are polishing and honing.
