

ARABESCATO VAGLI

Category: arabescato

Colour: White

Petrographic name (according EN 12407): Marble

Macroscopic

description: Arabescato Vagli marble is extracted from quarries in Garfagnana, Tuscany, a natural stone of great distinction and value characterized by a very elegant and recognizable background veining draw. As all Arabescato marbles, the background of Vagli is enriched by veining shaped as ovules, that in this case are grey, lighter and darker in shading depending on quarry and block of provenience.

Arabescato marble is a stone that is used for both interior design as for exterior applications thanks to its qualities of durability and strength. Vagli Arabescato is thus suitable for creation of staircases, floorings, façades and facings, fireplaces and countertops, but perfect as well for decorations and daily use objects. The finishings that best compliment the beauty of Arabescato vagli marble are polishing, buffing and brushing, that gives the stone a very nice antique effect, ideal for classical designs and installations.
