CALACATA VAGLI

Category: marbles

Colour: White

Petrografic name (according EN 12407): Marble

Macroscopic description: Calacata Vagli marble is one of the most precious materials that are extracted from the marble quarries in Carrara, in the Apuan Alps. A very versatile and valuable marble, Calacata Vagli is caracterized by a white background beautifully crossed by golden and pastel brown veining, that makes this stone recognizable and suitable in many types of different projects, residential and public.

Calacata Vagli marble is ideal for applications as bathrooms, kitchen tops, facings and facades for interiors and exteriors, elegant floorings also combined with another light and dark marbles, decorative objects and for daily use.
