

ROSSO FRANCIA

Colour: Red

Macroscopic description: Rosso Francia marble is a stone material with a beautiful dark red background extracted from quarries in France. Veined in white, sometimes gray or purple, this stone is perfect for valuable achievements especially for interiors, also in combination with other lighter marbles, excellent for beautifying classic environments and traditional design. The most suitable finish for this stone is certainly the polishing, perfect to make perfectly visible the splendid veins of Rosso Francia, in stark contrast to its deep red background.

Red Francia marble is used to create glossy coverings, stairs and floors, but also decorative objects with classic accents and antique parts, elements for walls and stairs and much more. Rosso Francia marble is used for precious and luxury settings, a marble capable of giving elegance, style and refinement to any environment, whether it be living rooms, stairs, bathrooms and kitchens.
