

STATUARIETTO

Category: marbles

Colour: White

Petrographic name (according EN 12407): Marble

Macroscopic

description: Statuarietto marble is a precious natural stone extracted from Carrara quarries, in Northern Tuscany Apuan Alps, a beautiful marble characterized by subtle stripes and veining that cross the pure white shiny background. Statuarietto is perfect in different applications, all for interior designs, as countertops for modern kitchens and bathrooms, facings, floorings, fireplaces façades, decorative objects and design elements for everyday use as vases, trays and many more. Statuarietto's very fine grain gives surfaces a splendid shine, the polishing is the finish that most compliments this material, highlighting its beautiful features.

Statuarietto is suitable for both classical style projects and modern and contemporary designs, a natural stone that reflects light, it is very recognizable and gives each design a unique and distinct personality, elegance and style.
