

## NAMIBIA PINK

**Colour:** Pink

**Macroscopic description:** Namibia Pink marble is a premium marble distinguished by its soft pink base color, enhanced with delicate beige and grey veins. Extracted from quarries located in Namibia, this marble is renowned for its quality and refined appearance, making it an excellent choice for luxury applications in both residential and commercial settings. From a technical perspective, Namibia Pink marble boasts high hardness, ensuring exceptional resistance to wear and scratches, making it ideal for flooring, wall cladding, and countertops. The low porosity of Namibia Pink marble guarantees good resistance to liquid absorption, minimizing the risk of stains and facilitating maintenance. With a water absorption coefficient of approximately 0.1% and a density of about 2.7 g/cm<sup>3</sup>, Namibia Pink marble demonstrates excellent structural properties. Its polished surface, achieved through high-quality finishing treatment, provides an elegant look and long-lasting brilliance. Its versatility makes it suitable for a wide range of applications, from exclusive interior design to grand architectural projects. Discover the timeless beauty of Namibia Pink and transform your spaces with a material that combines superior aesthetics and performance.
