

CALACATA FANTASTICO

Colour: White

Macroscopic description: Calacatta Fantastico marble is a rare and precious stone, extracted in Italy from quarries in Tuscany. The surface of Calacatta Fantastico marble, polished to a mirror finish, is characterized by an alternation of bluish and gray veins, intertwining and contrasting with the pure white background of the marble.

The interplay of colors that characterizes it is made even more captivating by fragments of white marble, creating a fascinating contrast. Adding to the beauty of this marble, a golden vein runs across the surface, separating and defining the different shades.

Calacatta Fantastico marble is suitable for indoor environments, adding a touch of magic and sophistication. It is also ideal for open-space applications due to the contrast between the white background and the veins, creating unique color effects.
